Getting Started with Reading Wonders

Please follow these steps to access your new Reading Wonders online curriculum:
1. Log in at district portal with district provided credentials.
2. Click the ELA title.
3. Click on the Teacher Edition for your Wonders curriculum (shown below).

4. You can now begin assigning digital resources to your students.
   a. For teachers with multiple classes, please use the dropdown in upper right corner of screen to switch between them.

Notes:
- Students will have limited access to online resources until their teacher launches the teacher center for the first time.
- Creation of new classes is automatic and based on information provided from the district Student Information System (SIS).
  o As a result, teachers do not need to manually create classes or manage students.
- Teachers no longer need to set a start date for their Wonders lesson plan calendar.
  o The start date, holidays, and non-teaching days already set by the district.
  o Teachers can add non-teaching days as needed to their individual class calendar(s).

- Class names and enrollments are based on information from the district SIS. Once created, class names do not change; however, student enrollment information is updated in Wonders *daily*.
  - Each class name will begin with the current school year (2021-2022) to help differentiate classes year-over-year.
  - New students are added automatically to Wonders classes based upon district SIS information.
  - Students that have dropped from a class will remain and can be removed by the teacher at their convenience.
  - If you have questions about inaccurate class enrollments, please contact your curriculum director and/or reading coach to first verify this information is correct in your SIS.
